

## Crystal Pacific Brings Color to Vinyl Windows and Doors

*Manufacturer Offers "Crystal Coat" Vinyl Paint Color Options*

**RIVERSIDE, CA, October 13, 2014** – Crystal Pacific Window & Door Systems recently announced the availability of in-house paint finishing for all its vinyl window and door products. The manufacturer, headquartered in Riverside, CA, now offers the *Crystal Coat* palette of seven (7) optional colors for all styles of its vinyl products, applied using its new state-of-the-art spray paint line equipment. The *Crystal Coat* colors complement the company's standard white and clay color extruded vinyl windows and make two-tone color combinations possible.

"Painted vinyl windows are a popular choice to complement stucco and custom homes here in Southern California, providing the look of wood windows without the higher price and maintenance that wood windows demand," said Bob Rodriguez, General Manager of Crystal Pacific. "Our vinyl windows and doors, with optional *Crystal Coat* vinyl paint finishing, are also ideally suited for light commercial and mixed-use properties as well as residential homes."

"Crystal Pacific vinyl window and sliding door customers now have many options and now they may choose from our seven earth tone colors for the exteriors with white or clay extruded color interiors," added Rodriguez. Available *Crystal Coat* colors are: Bronze, Black, Silver, Hunter Green, Red Rock, Almond, and Chocolate Brown.

The spray booth, manufactured and supplied by AFC Finishing Systems in Oroville, CA, meets all applicable U.S. EPA and California air quality, environmental and safety regulations. Paint curing can be done in about 20 minutes using the incorporated ovens. The new equipment enables Crystal Pacific to finish 300 windows or 100 sliding doors per day, and the company has added to its staff experienced paint booth technicians to operate the new equipment.

*Crystal Coat paint finishing is now available in seven optional colors, in addition to standard extruded white and clay colors.*

Crystal Pacific's new *Crystal Coat* vinyl paint option is available for a modest additional charge, and is offered with an outstanding industry-leading three-week turnaround processing time.

*continued*

"The typical lead time across the industry is 4 to 6 weeks to paint vinyl windows and doors," said Rodriguez. "With our new equipment, we can process and deliver paint orders within a 3-week time period, giving Crystal Pacific a significant advantage over other window suppliers. As for quality, one of our first *Crystal Coat* customers said the finish is the best he's seen in 10 years."

The paint used by Crystal Pacific is supplied by Blue River Coatings of Hastings, NE, comes with a 10-year warranty, and meets AAMA 615-05 superior performance levels. The high performance water-based Hydro-Tuff 2-Part/Acrylic Top Coat paint offers excellent adhesion and durability, is mar and abrasion resistant and stands up to the intense Southern California sunshine without degradation. Environmentally sensitive, the paint is a low-VOC and EPA compliant coating.

*Crystal Pacific's new in-house spray paint booth facilitates industry-leading turnaround time on customer orders.*
