

Crystal Pacific Introduces Vista PLUS Vinyl Window Line

RIVERSIDE, CA, January 29, 2016 – Crystal Pacific Window & Door Systems has expanded its residential vinyl product offerings with the introduction of the Vista PLUS window line. The upscale Vista PLUS windows complement the company's existing Vista window and sliding patio door lines and represent the first of many new innovative product introductions Crystal Pacific plans in the coming months. The Vista PLUS and all the other products of Crystal Pacific are fabricated in the company's 116,000-ft² facility in Riverside, CA.

The Crystal Pacific Vista PLUS windows are available in a full array of styles including single and triple sliders, single hung, picture, geometric shapes and combination units. All the Vista PLUS styles offer durable yet stylish design using multi-chambered vinyl extrusions that meet the company's 15-point quality assurance program. The even sightlines of the Vista PLUS windows further demonstrate Crystal Pacific's product commitment to aesthetics. The 3-1/4" jamb depth windows can be ordered in several frame styles – integral nailing fin, block with sloped sill adaptor or retrofit flush fin – to suit specific new construction or replacement project needs.

All Crystal Pacific products utilize thermally efficient dual-pane insulating glass with high performance Intercept[®] Spacer System technology to deliver low U-values and outstanding Solar Heat Gain Coefficient (SHGC) factors. Building on this solid base, the Vista PLUS line further improves the products with several standard and optional glass features. For superior thermal efficiency and sound attenuation, the Vista PLUS windows feature 1" insulated glass units (IGUs) and a variety of IGU glass packages, including two levels of low-E glass coatings and an Argon gas option. Tempered, obscured (frosted), tinted and other specialty glass are options, as well as flat or sculptured grids in several patterns.

Crystal Pacific Vista PLUS windows feature even sightlines, durable profiles with exquisite design, and a 1" IGU with several glazing options for superior energy efficiency. Vista PLUS windows are available in many styles and configurations, including sliders (above) and single-hung (below).

(continued)

Test ratings for the Vista PLUS products are outstanding. The sliding, picture and single-hung are all AAMA LC-30 rated. Vista PLUS windows also deliver great thermal performance with test ratings as low as 0.29 U-value and 0.22 Solar Heat Gain Coefficient (SHGC) possible. Vista PLUS windows, with the Low-E3/Argon glass package, surpass California Title 24 energy standards.

Crystal Pacific's Vista PLUS windows are also enhanced with standard Crystal View screens, which provide a dramatically clearer view. Standard adjustable dual-brass rollers with stainless steel axles make the operation of the new sliding window line virtually effortless. Auto sash locks provide convenience and security.

Vista PLUS homeowners can choose from a palette of seven (7) optional *Crystal Coat* colors in addition to standard white or clay colors. Using state-of-the-art equipment, the in-house *Crystal Coat* paint process delivers beautiful durable finishes providing the perfect complement or accent to a home's exterior.

Warranty is another area where Crystal Pacific and the Vista PLUS line excel. All Crystal Pacific products come with a lifetime limited warranty and Vista PLUS homeowners enjoy the added piece of mind of lifetime labor and all non-tempered glass breakage at no extra cost. Glass breakage coverage of tempered glass is available as an option.

Crystal Pacific is the West Coast arm of award-winning national manufacturer Crystal Window & Door Systems, which recently celebrated its 25th Anniversary of fabricating quality energy efficient products.
