

The Clear Choice Is Crystal

Types

Choose flat or sculptured grids.

5/8" Flat

1" Sculptured

Colonial Pattern*

Lite sizes are based around 12 inches for windows and 15 inches for doors. Depending on the configuration and size of the window or door, the lite size can be less within in a few inches or more within a couple of inches.

If you would like to change the default number of lites, please provide a drawing with the preferred number of lites. Otherwise the default will be used.

If you feel you need more lites or grid, keep in mind: less grid, more view.

Marginal & Queen Anne Patterns*

Grid perimeter is 4 inches to center of grid.

An extra charge may be applied if window height is less than 14 inches and or Queen Anne window width is less than 28 inches.

Valance Pattern*

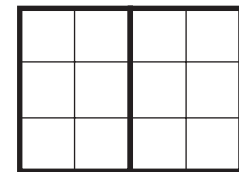

Default grid height is 10 inches to bottom of grid. If height of glass unit is less than 20 inches, default of grid height will be in the middle of glass unit.

**Measurements based on larger glass unit.*

**Drawing required for special grid patterns.*
